

# What They Say

---

Most of our business is repeat business. When we ask our clients why they keep calling, their answers prove that our approach works. Our clients tell us that their experience working with our firm is different. Here is what they say:

## **Executive VP – Fortune 100 Company**

"I have worked with all the top firms in D.C. and Stein Mitchell is a cut above. The dedication, creativity, judgment and teamwork they bring to the table has impressed me since our first day working together. They give me the impression that I am their only client and I wish that were true!"

### **"THE WISE ONES"**

- Washingtonian

## **President and Managing Partner of Private Equity Firm**

"We manage more than \$3 billion in capital commitments, and Stein Mitchell handles all litigation for our portfolio companies. They have consistently achieved outstanding results and have become a valued partner. When we encounter a new legal challenge, I know my first call."

### **"FIRST-TIER Law Firm in Washington D.C."**

- US News & World Report

## **Litigation General Counsel, Fortune 25 "Most Important Private Company"**

I cannot recommend this firm more highly. Stein Mitchell was our lead counsel in a major arbitration brought by a Fortune 100 energy company, seeking more than \$2 billion in damages, and represented by one of the most well-regarded litigation firms in the world. The claims concerned an incredibly complex and challenging project, with first-of-a-kind technology executed at a ground-breaking scale. When the dispute evolved, it was similarly complex, out-sized, serious and reputation-threatening.

With all of these challenges, the Stein Mitchell team could not have delivered a better result: a complete victory for our company. They brought leadership, excellent client communication, strategic thinking of the highest level, creative and energetic legal analysis and – most importantly – credibility to bear at all phases of the dispute. The sustained commitment and effort to winning the matter was based on doing everything better than the other parties – from understanding the underlying project and complex technology to dealing with every company witness with respect and understanding. The firm represented the company throughout the dispute with integrity and service of the highest quality.
